Jumps exceeds my expectation.
Good music, Challenging difficullty, simple action and high relaxation.
Thank you Timothy.. Looks good, Runs smooth, Honestly don't even notice that its Japaness with english subtitles, but I'm used to reading my J-RPG's dating back to Shining Force I & II.. Finally normal skin for Nomad. This game had given me a horrorfied experience eventhough the I've played and get used to the first game. It has good soundtrack, easy to control and as expected, it give you a chill down the spine with it slowpace gameplay like the previous games. Why by DLC for a game that is dead and abandoned...?. Clickdraw is an addictive completely RNG western clicker game*he says.The only acceptable part about this are the cards.Why is this garbage still on steam?!?!?!

It's like binding of isaac, but a lot worse and duller. Developer is releasing updates almost daily! Talks with the community and listens. The game is a mix of game dev tycoon but so much more advanced, even in it's early state.. I like that sh*tload of colors.. Recommended to me by one of my Twitch Viewers. I'm so glad they convinced me. It has an incredible movement system and a simple and strong aesthetic. The soundtrack is a perfect match to the visuals of the game as well. I've ran into a few parts that were difficult to pass, but the satisfaction of smoothly beating the level makes it worth it. Please give it a try..

philosopher's Ball 11/10. Generally, concept of simple racing game with low requirements appeals to me. This game can be ideal for playing short sessions on notebook or even ultrabook (On my Dell Latitude E7240 game runs in 30fps on lowest). Driving model is very simple (your car will never oversteer for example), so you can focus on racing, not fighting with car, however it requiers some learning at the beginning.
Unfortunately there are very few players in online mode at this moment, so you'll more often compete with bots raather than human players.
For me, this game is also too simple. Apart from actual racing you can choose server, car (18 models inspired by real supercars), go to lobby and wait for race in practise mode. If somebody connect to your lobby you will race with him. If not - you will race with bots. That's all. I think some simple tuning system would be nice addition.
Graphics is simple and legible, and that's all I can say about it.
Big plus for Linux version (working out-of-the-box)

Overall, "Simple Racing" has potential, but now it's unused due to very little content in game. I felt like playing tech demo rather than full game. But it was solid tech demo, so if the author will continue developing it, the game become very enjoyable little racing game for occasional playing in travel.. Film Noir inspired Adventure Game.

Graphics are simple. Soundtrack is great, Voice Acting is good. The Interface is very primitive (tip: highlighting is F1). Writing is pretty good. Characters are ... interesting: lets just say that Characters are written to be "period appropriate". Puzzles aren't exactly self obvious (I guess that is a good thing) - and could be accused of "pixel hunt".

This one is for Adventure Game veterans and Film Noir fans... Me, otherwise avoid.. I DO reccomend this game, it's phenominal and well made! A patch is in the works for Windows 8.1/10; but overall, this game is AMAZING, the idea for it is great, and the graphics are really good too. Do get this game, especially if you are a FNaF fan. As FNaF is over, this will be a good temporary replacement in the horror genre.. purchase dint get the dlc

- Scott S. (@MisterTtocS). **New Year's Day 2015 ~ Mini-Update**:

"Daniel, do you understand what you have to do?". **Just in time for the holidays.**:

We've launched two new mechs, M1KL and Safety Bot! M1KL was inspired by the AI from Archangel's original campaign, and now fights for the USFF as a light-class mech. Safety Bot was originally created for PWND, (Skydance's Arena Shooter), but was destined to war for HUMNX as a heavy-class mech. All pilots who've purchased the game can now battle in these new war machines.

In addition to the new mechs, we've re-tuned Archangel Hellfire based on balancing requests from our community in Discord: We appreciate all your feedback. Another shout-out and thank you to PeskyCashew for leading the charge on gathering the info in Discord.

PS: Want to wow someone who has it all this holiday season? Give them a six-story mech and gift Archangel Hellfire while it's on sale in the Steam Store...

Thanks for playing and happy holidays!. **High Speed™ is now available!**:
Hey everyone! We are proud to announce that High Speed™ is now available on Steam!

High Speed™ (1986): designed by Steve Ritchie and inspired by his personal experience, this table puts players in the role of a driver who is not planning on stopping. Run the red light and suddenly sirens shriek, lights flash, an APB is issued and the police chase is on! Flying over ramps and careening down freeways, the get-away is fast and furious! This was the first table to use Williams®' System 11 hardware, the first to play a complete song and it was the first to have a Multi-Ball Jackpot that increased and carried over from game to game. 17,080 units of this table were produced.

Check out the table in action!
